

## ***New Organics Recycling Program is Here!***

Dear Temecula Resident,

CR&R is pleased to announce the continuation of improvements to your residential waste collection system. Effective immediately you will now be allowed to recycle your kitchen food scraps by adding them to your existing yard waste collection cart. This is all made possible as a result of a new Anaerobic Digester Facility that CR&R has constructed in the City of Perris. As part of this new processing capability, your “Organic Materials”, mainly food and yard wastes, will now be converted into a renewable natural gas, the cleanest fuel available in the State of California. In addition, we will also be able to produce a high grade fertilizer for wholesale and retail markets. This new technology will now make it possible to permanently divert this material from the landfill.

CR&R will also be making Kitchen Food Scrap Pails available free of charge for Temecula residents. Food Scrap Pails will be available for residents on the following dates:

- April 23<sup>rd</sup> at the Temecula Spring Clean-Up Event located at Chaparral High School 27215 Nicolas Road, Temecula from 9am to 2pm
- April 30<sup>th</sup> at the City’s Field Operations Center parking lot located at 43230 Business Park Drive from 9am to 2pm.

Additional information can be found in the enclosed flyer. If you have any questions please call our Customer Service Team at 800-755-8112.

Thank you for participating in our new Organics Recycling Program!

Sincerely,

CR&R Incorporated
